www.rotarylif.com

WHAT COMES STANDARD WITH EVERY RUNWAY LIFT?

Versatility.

Decades of experience goes into every drive-on lift we build. These runway lifts handle cars, vans, and trucks with ease.

Functionality, space consideration, and improved productivity are key components to consider when investing in a new lift. Our designers and engineers have taken all these considerations and used them to develop the most innovative, reliable and productive drive-on lift products on the market today.

Focus on Greater Productivity and More Workspace

Take advantage of the quick set-up for undercarriage repairs and wheel service. These versatile runway lifts are proven, durable and require little to no maintenance. **Plus with Rotary's taller column design,** technician's work under the highest runway rise in the industry allowing more service access.

Supercharged Rotary Drive-On Lifts are available with **SHOCKWAVE Equipped Power**

Greater productivity means more profits and both can be achieved with Shockwave™. **Cycle your lifts 2 times faster!** Shockwave-equipped lifts are the fastest in the world helping you get more done in less time.

Superior Design with Rigorous Cycle Testing

Rotary lifts are a great value because they are engineered to provide years of trouble-free service. Rotary maintains the largest in-house mechanical, electrical and controls engineering staff in the industry. State of the art design, modeling and analysis software ensures you get a well designed, long lasting product. **Rotary's high performance hydraulic and mechanical lifting system,** concealed and protected under the runway, generates greater durability and a more efficient and dependable lift operation.

Rotary cycle tests its lifts and components for at least 20,000 cycles at rated load, giving you a robust, proven and quality tested lift that won't let you down.

Local Service and Support

Our sales force attends intensive training on our products and the issues that face service repair facilities. Rotary representatives can help you evaluate which lift best meets your needs. With a world-wide network of highly-trained Rotary Authorized Installers and Distributors, service and parts support is always close at hand.

All from the brand you've trusted since 1925.

Rotary Lift.

SHOCKWAVE-EQUIPPED LIFTS FEATURE

2X Faster rise and descent than standard four-post lifts*

Patent pending DC power - Operates during loss of facility power

Spotline™ motion activated laser helps spot vehicles the first time

Center vehicles in the service bays quickly and accurately using this laser-guided system.

Wall or ceiling mounted laser

Rotary DESIGN ADVANTAGE

SHOCKWAVE-EQUIPPED runway lift

***The Industry Standard
JUST GOT FASTER!***

Shockwave's DC patent pending power system gives you lower cost and more reliable operation while using two standard Group 24 batteries.**

Shockwave's built in battery charger uses 110v power, eliminating the need for expensive 220v wiring resulting in an installation savings of 80% or more!

*Actual rise and descent times may vary depending on weight of the vehicle. **Batteries not included.

SHOCKWAVE IS AVAILABLE ON SM14 / SM014 SERIES LIFTS

X14 14,000 LBS. CAPACITY DRIVE-ON SCISSOR LIFT

OPEN FRONT AND REAR DESIGN WITH VERSATILE WHEELBASE RANGE

Rotary's new 14,000-pound scissor lift offers an impressive 198-inch wheel base - service the smallest cars to the largest mid-sized trucks and vans.

Lift Features:

Intuitive console controls

40" between platforms for more access

True up and down movement saves bay space

Folding ramps with rear wheel chocks

The X14 open front and rear design creates space-saving working clearance through the entire middle of lift with open access points for easy movement - front, rear and side to side walk through - for accessing multi-bay projects and tool boxes.

Automatic Rear Wheel Chocks

engage when the lift is raised and release when lowered.

True up and down lifting movement saves bay space

25 - 1/2" wide runways create a greater drive on area.

All pivot points are made with self lubricating bushings for long life.

Base plate leveling system for easy installation.

VERSATILE 198" WHEELBASE RANGE
Service a larger range of vehicles

Model Shown: X14N10110
14,000 lbs. capacity drive-on surface mounted scissor lift

Intuitive Control Unit

Built with robust, simple buttons and switches for long life.

Robust Hydraulic System

Simple, reliable master / slave hydraulic system maintains level platforms during entire lifting cycle.

Mechanical locks with 14 locking positions, automatically engage and pneumatically release, ensuring maximum security when lift is in raised positions.

Surface model shown.
Recessed models available.

Optional Rolling Jacks increase service opportunities by lifting front, rear or all wheels off the runways for brake, tire, suspension and two or four-wheel alignment work.

Rotary DESIGN ADVANTAGE

X14 PRODUCTIVITY & PERFORMANCE

1. TRUE UP / DOWN LIFTING
2. VERSATILE WHEELBASE RANGE
3. OPEN FRONT AND REAR FOR BETTER VEHICLE ACCESS
4. THIRD-PARTY ETL GOLD CERTIFIED

X14 LIFT SPECIFICATIONS

Model:	X14
Lifting Capacity	14,000lbs. (6350kg)
A. Maximum Rise*	72 - 3/4" (1848mm) surface mounted
B. Lowered Height	10 - 3/4" (275mm)
C. Width Overall	91" (2310mm)
D. Overall Length	277" (7035mm)
E. Runway Width	25 - 1/2" (648mm)
F. Width Between Platforms	40" (1015mm)
G. Runway Length	216" (5486mm)
Max. Wheelbase	198" (5038mm)
Motor / Voltage	5 hp / 230 volt / Single Phase
Time of Full Rise	77 seconds
Lowering Time	47 seconds
Compressed Air Connection	85 -110psi
Recommended Bay Size	14' x 27' (4.26m x 8.22m)

SM14

14,000 LBS. CAPACITY FOUR-POST LIFT

DRIVE-ON CLOSED FRONT LIFT

SM14 Series drive-on lifts are engineered for commercial service, are ALI/ETL certified and exceed our industry exclusive performance durability cycle testing.

These 14K capacity lifts come standard with unmatched features, equipment and a array of productivity enhancing accessories. Three available wheelbases allow any shop to service a wide range of vehicles from cars to full size trucks. Bolster your service offerings and boost your bottom line with Rotary Lift, the most proven vehicle lifting name in the industry.

Lift Features:

Higher rise to over 78" provides more work area under the vehicle

Powder coated hammer tone paint finish improves durability and paint life

Louvered ramps with polymer rollers provide improved traction and less floor gouging when driving on the lift

Available with SHOCKWAVE - creating 2X faster rise and descent

EL model has more than **9 additional inches of wheelbase**

Higher Rise

Taller column design creates a 9" higher rise to over 78" providing more work area under the vehicle and 18 different locking positions

Filter/regulator/lubricator for clean, lubricated air which will extend the life of your lift and air powered tools

1/2" steel cable for greater lifting capacity

Single piece 5/16" steel one-piece runway with non-welded track that is part of the runway for strength and durability

Single point operation with air operated lock release

The power unit is located in the front of the lift allowing us to place the latch air release on the same column creating better access to the controls. The universal bracket allows mounting on the front or the side of the column

Hydraulic cylinder and mechanical lifting system are mounted and concealed inside runway to protect them from corrosives and physical damage

SM14

CLOSED FRONT DESIGN

Shown: SM14U101Y 14,000 lbs. capacity
SHOCKWAVE-EQUIPPED runway lift

Available with
SHOCKWAVE™

EXCLUSIVE PATENTED FEATURES

Patented dual function Sentinel Lock™ system features a slack cable guide arm that stays "on guard" to manage the lock latch. In a slack cable situation, the lock system kicks the lock into position. Fewer parts means less opportunity for service issues and more peace of mind.

Adjustable latch bars ensure the runways are level when resting on the latch bars at any of the multiple locking positions.

Robust hydraulic and mechanical lifting system design - concealed and protected under the runway, high performance cables and sheaves generate greater durability and a more efficient and dependable lift operation

41" louvered ramps for improved drive-on traction.

Wheel chocks automatically engage when lift is raised

Polymer rollers protect shop floor and adds a quieter operation

Powder coated hammer tone paint finish improves durability and paint life

SM14 LIFT OPTIONS

Rolling Jacks

Increase your service opportunities by lifting front, rear or all wheels off the runways for brake, tire, suspension and two or four-wheel alignment work

#RJ7000Y
7,000 lbs. capacity

Bolt-On Alignment Kits with new, easy-to-use patented spacer plate

Convert your general service four-post lift into an alignment lift that is compatible with Rotary Wheel Service alignment systems. Comes standard with stainless steel turning radius gauges.

SM18

18,000 LBS. CAPACITY **FOUR-POST LIFT**
SERVICE CARS, VANS AND COMMERCIAL VEHICLES WITH EASE

When it comes to vehicle services, the versatile SM18 can handle a wheelbase range up to 230" and adding optional alignment equipment converts this lift to match Rotary Wheel Service alignment systems.

18,000 lbs. capacity means more shop advantages

Take your shop services to the next level with the SM18 four-post lift. Designed without obstructions to vehicle access, technicians have room to move increasing productivity making this lift is big on performance without taking away signature Rotary lift features.

This lift is loaded with standard features you only expect to see with a Rotary drive-on lift.

Single point release air-locks save valuable working time by releasing all four spring loaded column locks with the push of a single lever.

The heavy-duty hydraulic cylinder and lift mechanism are located underneath the runway, eliminating damaging vehicle obstructions and prolonging the hydraulic system's lifespan.

Automatic ramp chocks engage when the lift is raised. Clearance holes allow the ramp chocks to clear runways bolts with less noise on vehicle approach.

Filter/regulator/lubricator for clean, lubricated air which will extend the life of your lift and air powered tools

1/2" steel cable for greater lifting capacity and durability

Protective strips on ramp ends reduce noise and eliminate floor gouging.

Removable work step
Optional accessory for the SM18, this repositionable stand fits the outer sides of the four-post runway slots as shown.

EXCLUSIVE PATENTED FEATURES

Patented dual function Sentinel Lock™ system features a slack cable guide arm that stays "on guard" to manage the lock latch. In a slack cable situation, the lock system kicks the lock into position. Fewer parts means less opportunity for service issues and more peace of mind.

Adjustable latch bars ensure the runways are level when resting on the latch bars at any of the multiple locking positions.

Optional rolling jacks with a variety of adapters lift front, rear or all wheels off the runways for brake, tire, alignment and suspension work. When idle, the jacks roll out of the way to provide unobstructed workspace between runways.

#RJ9000YBK
#RJ9000Y-1BK
9,000 lbs. capacity

Internal airline connections let two rolling jacks operate simultaneously.

Front wheel stops can easily be replaced by optional drive through ramps

Transform your existing flat top SM18 runway lift into a fully functioning alignment lift.

The kit fastens to the side of the lift runway and features adjustable flush mounted components that accommodate a variety of vehicle wheelbases.

SM30 30,000 LBS. CAPACITY RUNWAY LIFT

SERVICE A VARIETY OF VEHICLES WITH MAXIMUM PRODUCTIVITY

Heavy-Duty 30K Four Post Drive-On Lifts - Service Wheelbases Up To 307"

Take lift service to the next level with this four-post designed without side obstructions and better vehicle access. With a 68" lifting height, the SM30 clear floor design allows technicians room to access tool boxes and other shop equipment increasing productivity and reducing downtime. Plus, the single point air-lock release releases all four spring loaded column locks at one time adding greater productivity.

Numerous accessories turns this lift into a complete service solution for any shops' needs. These lifts handle cars, vans, trucks - even light and medium duty commercial vehicles with ease. If you service a wide variety of vehicles, Rotary 30,000 lbs. capacity SM30 lifts are the right choice for maximum productivity.

HDC36 HEAVY-DUTY RUNWAY LIFT

PRODUCTIVITY AND PERFORMANCE IN A DRIVE ON LIFT

Make sure your shop is ready for more business servicing larger vehicles with ease. Technicians can work quicker and more efficiently with a level peace of mind. And, raise your fleet faster with an industry best rise time of 68 seconds!

LOWER YOUR COST OF OWNERSHIP

This stout four post lift will lift big box trucks, single axle dump trucks all the way down to your shop tool truck. The HDC36 allows you to operate the lift from any column, saving valuable time. DC battery operated with an onboard charger that needs only 110v electricity to charge, this affordable four post lift is easy to operate and inexpensive to own.

ENVIRONMENTALLY FRIENDLY FEATURES

Surface mounted and anchored, it requires no excavation

Optional high efficiency LED lighting saves electricity and money over comparable incandescent and fluorescent lighting

Bio fluid ready

WHEEL CHOCKS

Automatic wheel chocks engage when the lift is raised and ramps are off the floor

ANCHORED COLUMN SUPPORT

Four easy to install wedge style anchors secure each heavy duty column to the floor

DESIGN FEATURES

- 28" wide runways with two available lengths and capacities handle any number of vehicles from cars to the largest trucks
- Clear floor four-post design creates an open work area
- 79" lifting height benefits the tallest techs
- Standard internal airline connections let two rolling jacks operate simultaneously and provides outlets for air tools
- Optional wheel kit is available to provide portability for each column adding movement within your shop.

BATTERY OPERATED LIFT WITH ONBOARD CHARGER

- Generates at least 1.5 X faster lift cycle times
- No special AC wiring costs or requirements
- Low electrical usage - *DC battery power** and 110V charging
- Fully functional when the power goes out

* Battery purchased separately for international use

INVERTED HYDRAULIC CYLINDER

The hydraulic cylinder is inverted inside the carriage so the chrome piston rod is protected from debris and damage - extending the life of the column and reducing maintenance frequency and cost. No lifting cables or chains means less maintenance.

HORSESHOE WIRING

The HDC is connected by three communication cables, (forming a horseshoe) protected within the lift runways.

35,900 lbs. capacity
Shown with optional rolling jacks

PATENTED CONTROL SYSTEM

Operate lift from ANY post with this user-friendly, exclusive control system

- Intuitive controls - lift can be controlled from ANY column
- Position memory - lifting cycles are configured and set creating a two step process: turn each column on, lock the columns and go!
- Programmable controls show operational status for each column plus, program a height limiter
- Real time height reading
- Ability to raise or lower a single end
- Level lifting within 1" at each column
- Battery Indicator
- Oversized E-Stop button located at each panel
- Audible descent alarm for added safety

E STOP Button

THIRD PARTY CERTIFIED

The HDC Series lifts meet the ANSI/ALI ALCTV 2011 standard, including the required third-party validation. Your assurance of certification is the gold ALI/ETL certified label.

LOW DRIVE-ON HEIGHT

Ramps and runways accommodate a variety of vehicle types. Optional drive thru ramp kit available.

Add optional **rolling bridge jacks** and increase your service opportunities by lifting wheels off the runways for two-wheel alignment work.

Accommodates wheelbases up to 30'

HDC50/60 HEAVY-DUTY RUNWAY LIFT

THE MOST VERSATILE AND FASTEST FOUR-POST LIFT IN THE INDUSTRY

Operator friendly designs and industry exclusive features offer you a drive-on four post lift that's easier to use and faster than similar competitive lifts.

LOWER YOUR COST OF OWNERSHIP

With no complicated or expensive electrical installation, no cables, chains or sheaves to maintain and fewer moving parts, the fully hydraulic HDC50/60 is one of the most dynamic four-post lifts in the industry! DC battery operated with an onboard charger that needs only 110v electricity to charge, this affordable four post lift is easy to operate and inexpensive to own. Choose the lift model that fits your needs best - both runway lengths are available in both lifting capacities!

ENVIRONMENTALLY FRIENDLY FEATURES

Surface mounted and anchored, it requires no excavation

Optional high efficiency LED lighting saves electricity and money over comparable incandescent and fluorescent lighting

Bio fluid ready

INVERTED HYDRAULIC CYLINDER

The hydraulic cylinder is inverted inside the carriage so the chrome piston rod is protected from debris and damage - extending the life of the column and reducing maintenance frequency and cost. No lifting cables or chains means less maintenance.

WHEEL CHOCKS

Automatic wheel chocks engage when the lift is raised and ramps are off the floor

DESIGN FEATURES

28" wide runways with two available lengths and capacities handle any number of vehicles

Clear floor four-post design creates an open work area free of interference

Industry best rise time of 65 seconds

78" lifting height benefits the tallest techs

Standard internal airline connections let two rolling jacks operate simultaneously and provides outlets for air tools

PATENTED CONTROL SYSTEM

Operate lift from ANY post with this user-friendly, exclusive control system

Position memory - lifting cycles are configured and set creating a two step process: turn each column on, lock the columns and go!

- Programmable controls show operational status for each column plus, program a height limiter
- Real time height reading
- Battery Indicator
- E-Stop button located at each panel
- Audible descent alarm

ANCHORED COLUMN SUPPORT

Four easy to install wedge style anchors secure each heavy duty column to the floor

Shown: HDC60U000
60,000 lbs. capacity four-post lift

BATTERY OPERATED LIFT WITH ON-BOARD CHARGERS

- Generates faster lift cycle times
- *at least 1.5 X faster than comparable lifts*
- No special AC wiring costs or requirements
- Low electrical usage
- *DC battery power* and 110V charging*
- Fully functional when the power goes out

* Battery purchased separately for international use

THIRD PARTY CERTIFIED

The HDC Series lifts meet the ANSI/ALI ALCTV 2011 standard, including the required third-party validation. Your assurance of certification is the gold ALI/ETL certified label.

HORSESHOE WIRING

The HDC is connected by three communication cables, (forming a horseshoe) protected within the lift runways.

Rotary DESIGN ADVANTAGE

HDC Four-Post

PRODUCTIVITY & PERFORMANCE

1. **PATENTED CONTROLS FOR ACTIVE LEVELING**
2. **DC POWER - PROVIDES SPEED**
3. **DIRECT CYLINDER LIFTING**
4. **THIRD-PARTY ETL GOLD CERTIFIED**

Power Usage	Battery powered Charges on 110V	Battery powered Charges on 110V

*BOTH 28' AND 33' RUNWAY LENGTH MODELS ARE AVAILABLE AS 50,000 AND 60,000 LBS. CAPACITY LIFTS

Standard color of HDC50 / 60 lifts are red.  Additional colors may be available - consult your RAL3002 Rotary® representative for details and pricing.

Add optional **rolling bridge jacks** and increase your service opportunities by lifting wheels off the runways for two-wheel alignment work.

LOW DRIVE-ON HEIGHT

Ramps and runways accommodate a variety of vehicle types. Optional drive thru ramp kit available.

SERVICE WHEELBASES UP TO 33'

Shown: HDC60U000
60,000 lbs. capacity four-post lift

OPTIONAL LIFT ACCESSORIES

Increase bay productivity with these drive-on lift accessories

TECH LIGHT™ Line Light 4 LED Lighting Kit

Attach the four 54" light wands to runways for effective, efficient lighting where you need it.

- 120V AC input voltage
- 60hz

#FA5700 Lighting unit includes 60W power supply unit, 16' cable lengths and 8 magnetic suspensions

Rolling Jacks

Increase your service opportunities by lifting front, rear or all wheels off the runways for brake, tire, suspension and two or four-wheel alignment work. **Contact factory for additional details and options**

#RJ152BK
Lower profile w/ drop in adapters
SM30 lifts
15,000 lbs. capacity

Air / Utility Box

Mounts easily on any column and provides quick access to utilities

- Two 110v electric outlets and air connection
- The filter/regulator/lubricator helps extend the life of your air tools

#FA915 KIT

Oil Drain Pan

Available for most lifts, drain pan includes splash guard, drain valve and dust cap.

CONSULT FACTORY FOR OPTIONS

Removable Work Steps

Fits 14K and 18K four-post lifts with slots on sides of runways as shown.

#FC5663YL

Internal Airline Kit

Standard Internal airline connections let two rolling jacks operate simultaneously, and provides air outlet on the runway.

Internal airline kit #FC5760-14 not available for 30,000 to 60,000 lbs. capacity lifts. Consult factory for details.

#FC5760-14

Swing Air Jacks

6,000 lbs. and 8,000 lbs. capacity swing air jacks pivot and lay flat between the runways when not in use.

#SJ6000 and #SJ8000 SM / AR SERIES Lifts accessory

Bolt-On Alignment Kits

Convert your general service four-post lift into an alignment lift that is compatible with the new technology 3-D alignment equipment on the market today. Comes with stainless steel turning radius gauges.

CONSULT FACTORY FOR OPTIONS

Ramp Kits

Allows for drive-thru capability

- Oil resistant, non-skid coating
- Includes two ramps and hardware
- Extended length ramps for low clearance vehicles available

CONSULT FACTORY FOR OPTIONS

HDC SERIES HEAVY DUTY LIFT ACCESSORIES

Optional Rolling Jacks

Air operated rolling jacks can be attached to the runways creating various lifting options to make these lifts even more versatile.

Mobility Kit

Optional wheel kit is available to provide portability for each column adding movement within your shop.

#M140111RD

Optional LED Lighting

High-efficiency LED runway and column-mounted lighting systems. These easy-to-use lighting systems provide hands-free, effective lighting under the vehicle.
